Instructions KEYMACRO is a plugin for Gmail. It works with Gmail API. It's a GMail Auto-Reply Keymacro. How to use Press the Key combination by mouse. Open email at receiver and click the Key combination to set the text format for current email. Press the Key combination by mouse. Open email at sender and click the Key combination to set the text format for current email. How to set the Key combination Right click Gmail and select "Edit the Key". Select Key combination for [sender][receiver] and set it. You can use the different Key combination for [sender][receiver]. To select the Key combination, you can select "Markdown text format" or "Hyperlink text format". See the example of Key combination and the Key macro. Press the Key combination by mouse and click the Key macro to add to the subject line. You can add the macro to the sender or receiver. I only want to add this for the gmail app for Apple. You can do it by yourself if you want to add this for all the google apps. Extract gmail-keymacro.crx from the zip file. Open Chrome and go to chrome://extensions/. Click the "Developer mode" and select "Load unpacked extension". Select "gmail-keymacro.crx". Click "Install". Done! A: The best way to achieve this is to use Gmail "Sign-in with Dropbox" option. Go to Gmail > Preferences > Account and "Sign-in with Dropbox" will be selected by default. Then just sign-in with your Dropbox account. Once you are signed-in, click the mail icon on the top right hand side of your screen. You will see the dropdown icon - which is the option to add attachments directly from your Dropbox account. 2edc1e01e8
