element on the steering column for adjusting a gearshift shaft of the transmission; an emergency operation control element on the steering column for adjusting a gearshift shaft of the transmission when an emergency operation is recognized; and a control electronics unit for controlling the control elements, the control electronics unit being connected to the control elements at least indirectly by way of a long-range data bus. In German Published, Non-Prosecuted Patent Application DE

## Instrukcja Obsugi Seat Altea Pl

The idea of the project is not just a car as it has typical functionality. The founders of the project is qualified personnel of the car market and the automobile. The basic idea of the project, which was born in the premises of a Group of Competencies, is to give an object that is progressive, at a time when more original designs, simple in execution and that defends it from the test of time. Another concept of the project is to create a compact car that participates in the series of models that is now also more than 30 years. In the field of the sports series the car Seat Altea XL is. The purpose of the project is to unite all the elements of a car with which it is possible to enhance its structural beauty, as well as the power, speed and performance, for which it is the most competitive model of the series. The special design of the XL ensures that its power does not entail undue weight. SEAT TOLEDO has been extended, which is a multi-function vehicle, and the SEAT ALTEA is a compact version of the car. It offers surprising storage space and has the appearance of a station wagon with the body of a compact vehicle. Familial to the company is the idea of reconditioning, a philosophy that is defined as the aim of all the ideas and actions of a company is to preserve its natural beauty, to make them faster, easier to use and drive it and to take care of it. The company of SEAT is registered in the Department of Competences of

the CS as a Group of Experts in the field of design and engineering of automotive vehicles. People who have been involved with SEAT in various stages have participated in the development of several projects, making up to date the new SEAT ALTEA an evolution of the compact vehicle. The staff experienced in the field of designing and the logistics activities in the creation of the new SEAT ALTEA have been integrated in a team specially designated by the company to design and build the new vehicle, the original construction of which should be in near future. Production is planned to begin in 2015 at the company's manufacturing plant in Seo, as soon as the decision is taken on the specifications to be used in the production of the vehicle and the equipment used to manufacture it. There are several technical characteristics to this project that serve to make the new vehicle are much more attractive for the end user and more 04aeff104c
